

TNWC - SS/DS Narrow Web Cleaner

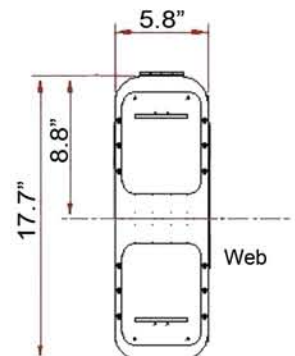

The TNWC-SS/DS model line is a range of single or double-sided narrow web cleaners available in a variety of cleaning widths. High performance, moulded elastomer cleaning rollers remove particulate contamination down to sub micron levels from the web and transfers it to pre-sheated adhesive rolls (Patent Pending) for later removal from the work area. Standard features include clam shell opening for web threading and maintenance access, telescopic slides for side access to both adhesive rolls & passive static elimination at exit side. The TNWC-SS/DS ensures optimum cleaning performance for yield & quality improvement and reducing line downtime.

TNWC-DS with optional external diverter roller

FEATURES & BENEFITS

- Full Contact/Transfer cleaning systems for reel-to-reel substrates
- Double or Single-sided contamination removal down to sub micron level
- Moulded elastomer rollers for optimal cleaning performance & low maintenance
- Integral telescopic slides for side access to both pre-sheated adhesive rolls
- Available in multiple cleaning widths
- Passive static elimination system - Active system optional
- Full enclosure cabinet/guard
- Clam shell opening for easy web threading
- Small profile for easy installation
- Automatic operation from host line with manual override
